Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). ISO's technical work is normally carried out through ISO technical committees in which each ISO member body has the right to be represented. International organizations, governmental and nongovernmental, in liaison with ISO, also take part in the work.

In order to respond to urgent market requirements, ISO has also introduced the possibility of preparing documents through a workshop mechanism, external to its normal committee processes. These documents are published by ISO as International Workshop Agreements. Proposals to hold such workshops may come from any source and are subject to approval by the ISO Technical Management Board which also designates an ISO member body to assist the proposer in the organization of the workshop. International Workshop Agreements are approved by consensus amongst the individual participants in such workshops. Although it is permissible that competing International Workshop Agreements exist on the same subject, an International Workshop Agreement shall not conflict with an existing ISO or IEC standard.

An International Workshop Agreement is reviewed after three years, under the responsibility of the member body designated by the Technical Management Board, in order to decide whether it will be confirmed for a further three years, transferred to an ISO technical body for revision, or withdrawn. If the International Workshop Agreement is confirmed, it is reviewed again after a further three years, at which time it must be either revised by the relevant ISO technical body or withdrawn.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Workshop Agreement IWA 2 was approved at a workshop held in Acapulco, Mexico, in October 2002, which was hosted by the Mexican General Bureau of Standards (DGN). Additional support and cooperation was provided by the Mirror Subcommittee for Quality Management Systems within the Mexican ISO Committee, the Mexican Institute for Standardization and Certification (IMNC) and the National Committee for Standardization on Quality Management Systems (COTENNSISCAL). The meeting was facilitated by the Latin-American Institute for Quality, (INLAC).

This second edition cancels and replaces the first edition (IWA 2:2003), which has been technically revised.

This revision to IWA 2:2003 was approved at a workshop held in Busan, Korea in November 2006, which was hosted by the Korean Agency for Technology and Standards, with the support and cooperation of the organizations in charge of coordinating the Mirror Subcommittee for Quality Management Systems within the Mexican ISO Committee.
